

GOVERNANCE & DUE DILIGENCE

The increasing growth of the UK and global renewable energy sector is increasing the interest in investment opportunities. Financial and technical aspects of an investment are always a priority, however, the health & safety risks & opportunities are playing an increasing role in decision-making. This course provides for understanding on how to take a proportionate and risk-based account of issues as part of investor due diligence and ongoing governance responsibilities.

All attendees receive **FREE** copy of a Governance & Due Diligence guide only available via this training course.
